

Task Priority is assigned a priority number between 0 and 11, with Level 0 being reserved for the most urgent tasks.

ALL TASKS MUST BE APPROVED BY JAMIE MERRITHEW before IT will begin work on it.

- 0 - Top Priority (Choose sparingly, these are compared against other's "Top Priority" requests)
- 1 - New feature and re-occurring bugs. Problem blocks productivity, or will greatly increase productivity
- 2 - Long term projects, preventative maintenance. Important Problems that do not require immediate response
- 3 - Tasks in Queue. Main drawing pool as tasks move up the queue.
- 4 - New large scope projects and features. Things that don't exist but would be helpful.
- 5-11 - Holding places for non-essential, non-immediate requests.

Please select a priority level that accurately summarizes your current issue.
